Redux
SQL (MsSQL, SQLlite)

WORK EXPERIENCE

Software Engineer / IT
Key Performance Petroleum
- 📅 Oct 2020 - Jan 2022   📍 Navasota, Tx
- • Held weekly meetings with CEO, Head of Sales, and Dispatch Lead, architecting tech projects to assist opportunities across all departments
- • Refactored existing salesman applications and server functions
- • Assisted with general IT help tickets company wide (internationally)
- • Created data structures for custom applications to be integrated into existing enterprise software
- • Developed IOS versions of existing custom applications using react native

Manager In Charge
H-E-B
- 📅 Nov 2016 - Oct 2018   📍 La Grange, Tx
- • Insured the daily goals of each department were met and communicated by shift leads
- • Maintained cross departmental knowledge to step in for total store needs
- • Handled nightly truck inventories and paperwork
- • Managed on site third party vendors to insure expectations and inventory were met

PROJECTS

Sport Betting App (fact-or-cap.com)
Creator & Solo Developer
- 📅 Jan 2022 - current
- • Designed a UI for documenting claims/bets on sports events using React JS, Material UI
- • Created a secure and efficient client to display games, bets, and user account information using Redux, React Router, and Axios
- • Architected data structure and lifecycle with Mongo Database
- • Built Server and all functions to handle/change data throughout the project
- • Deployed live versions with Firebase Hosting and Function Server

Dispatch Process (Key Performance Petroleum)
Project Manager & Lead Developer
- 📅 August 2021 - Dec 2021
- • Wrote SQL queries to handle custom integrations from our existing enterprise software server
- • Built Driver iOS App w/ React Native to receive and update orders real time, gather signatures and record GPS locations
- • Communicated with Head of Dispatch to create a custom dispatch management portal (React JS)
- • Processed over 1,000 dispatched orders in two months live runtime
- • Reduced order discrepancy loss via realtime iOS driver app
- • Integrated live truck tracking from 3rd party hardware API (Samsara)
- • Held weekly meetings with CEO for project clarity and expansions
